

# bugaboo wheeled board

A child can stand and ride on the wheeled board. You can fold up the wheeled board. The wheeled board has two clamps, a swivel wheel and an elastic band. The elastic band has a Velcro strap, a hook and an adjustable catch for fixing the wheeled board in the folded up position.

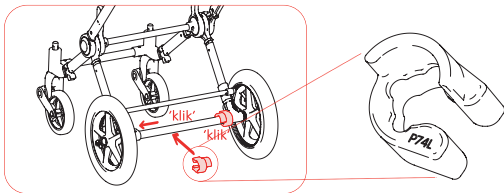

Remember NEVER to place your child on the wheeled board before you have correctly secured the wheeled board.

**Note** On the Bugaboo Classic, the underseat bag cannot be placed on the wheeled board side.

Read this user guide first.

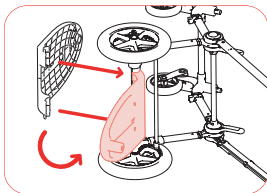

## 1 fit the wheeled board on the axle of the big wheels

- Place the chassis in the 4-wheel position with the brake applied.
- Take your child out of the carrycot or seat.
- Place the handlebar above the big wheels.
- Push the clamp with letter "P74L" on the axle of the big wheels. Slide the L-clamp to the left.

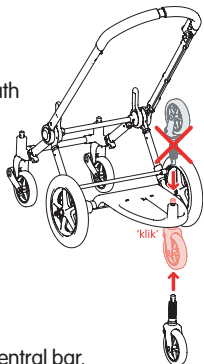

- Now push the clamp with the letter "P74R" on the axle. Slide the R-clamp to the right.
- Rotate the clamps around the plastic of the axle of the wheel holders.
- Place the chassis on the ground on one side.

- h. Take hold of the wheeled board and turn the protruding lips between the clamps and the axle. When rotating the wheeled board, hold it against the axle.
- i. Rotate the wheeled board halfway around the axle of the big wheels and place the chassis on 4 wheels.

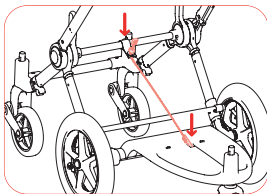

- j. Push the swivel wheel in the holder underneath the wheeled board. You will hear a 'click' when the wheel is attached properly.

**Note** Do not fit the swivel wheel to the wrong side of the wheeled board.

## 2 folding up the wheeled board

- a. Fasten the elastic band's Velcro strap to the central bar.

- b. Place the hook in the recess on the wheeled board.
- c. Pull the elastic band and fasten it in place with the release catch. The wheeled board is now folded up.

**Note** Remove the wheeled board by following the above instructions in reverse order.

## WARNINGS

- NEVER use the wheeled board before you have read the user guide.
- NEVER leave your child alone on the wheeled board. Prevent your child from falling and being injured.
- NEVER let go of the Bugaboo when your child is standing on the wheeled board. Prevent your child from falling and being injured.
- NEVER allow your child to ride on the wheeled board without holding onto the buggy. Make sure your child is well supported and stable.
- NEVER use the wheeled board for a child heavier than 20 kg.
- NEVER place the handlebar above the swivel wheels when you are using the wheeled board.
- NEVER use the wheeled board for anything other than that for which it was made.
- Care should be taken when using the wheeled board over rough or irregular surfaces. Children should be removed from the board when the stroller is pushed over curbs or similar obstacles.
