Thank you for purchasing a quality VALCO product. Due to our policy of continuous product development, this model is constantly evolving. It is possible that some features or procedures outlined here have changed since this document was written. If you are unsure of any procedure outlined here please contact the store from which you purchased it to obtain the most up to date information, or contact us via the internet. See relevant web contact addresses on the back page.

## PREPARING FOR / INSTALLING / REMOVING YOUR BASSINET

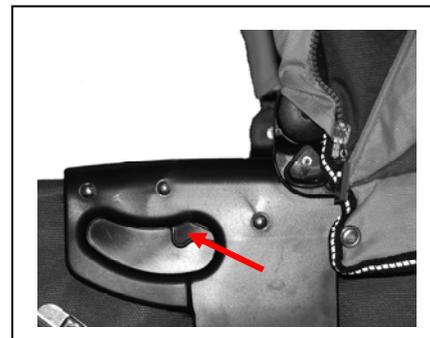

Remove the bassinet from the carton and dispose of all packaging immediately and thoughtfully.

1. Remove the seat fabrics and bumper bar from your RUNABOUT stroller.
2. Inside your bassinet package you will find a set of 2 plastic locking pieces.
3. With the release buttons facing inward, insert each locking piece in turn into the plastic housing on either side of the stroller frame.

1. Standing at the side of the chassis and holding the bassinet at both sides by the plastic hand holds; tilt the bassinet slightly toward you.
2. Gently slide the bassinet housing just over the plastic locking piece closest to you in the chassis.
3. "Line up" the other side and repeat step 2. Press down gently on the bassinet and it will slide into place.

1. To remove; holding the bassinet by the plastic grips on either side, simultaneously press the two triggers located in the grip.
2. Gently lift the bassinet from the frame.

## CARRYING YOUR BASSINET / ADJUSTING THE HOOD

Your Runabout bassinet has been designed to be easily removed and carried.

To carry the bassinet, grab the padded hood bar at the top of the hood and away you go! The hood system automatically locks the hood in the **OPEN** position, and has been designed so that the hood will not collapse when carried.

To fold the hood down, press down on the hood lock (one side only) to release the hood, and simultaneously push back on the carry bar.

Your Runabout Tri Mode bassinet has a removable (and washable) inner lining.

1. To Remove; carefully lift off the lining, taking special care when undoing the press studs.
2. To Replace; following the contours of the bassinet rim, line the studs in the lining with the corresponding studs in the bassinet body. Fold the lining over the rim and fasten the studs carefully.

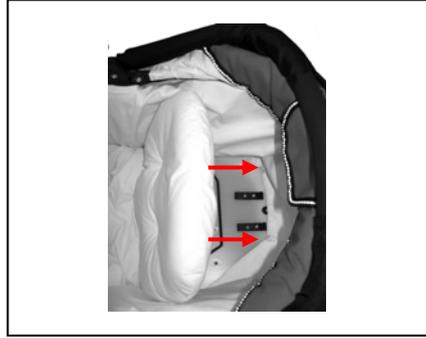

**ALWAYS ENSURE THAT THE HOOD IS SECURELY LOCKED IN PLACE BEFORE CARRYING THE BASSINET.**

## “SIT UP” SYSTEM

Your Runabout Tri Mode bassinet has been equipped with a new “sit up” seat function. This is for use when your child is able to sit up unassisted and increases the practicable age that your child can use the bassinet.

1. Lift the sit up backrest to about 90° degrees to the base.

2. Swivel the locking arm outward until it rests firmly in the channels, up against the locking stoppers.
3. To disengage, reverse this process.
4. Attach your additional harness (bought separately) to the “D” rings installed in the base of the bassinet at either side.

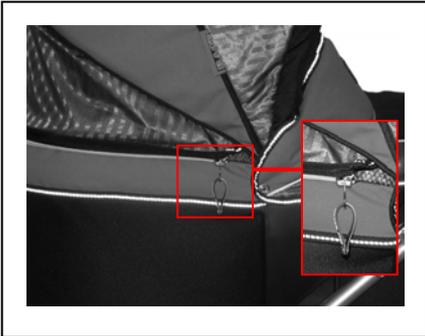

**WARNING:** Your child must ALWAYS be harnessed when in the sit up position.

## SUN CAP

Your bassinet is equipped with a sun cap which extends from beneath the hood to provide additional sun protection.

## AIRGO™ SYSTEM

To increase the airflow through your bassinet, simply unzip the special panel at the rear of your hood, lift the cover and secure it with the toggle and elastic loop at the top of the panel join.

## EXTRAS (included)

Zip in **INSECT NET**

## EXTRAS (included)

Zip in **RAIN COVER**

## OPTIONAL EXTRAS

**BASSINET STAND**

**UNIVERSAL HARNESS**

**WARNING: YOUR CHILD MUST ALWAYS BE HARNESSSED WHEN USING THE SITUP SECTION**

## WARNINGS

### Your child's safety is your responsibility .....

Be sure to check that all clamps and buckles are securely fixed and in place before use. Check all parts for breakage or fatigue before use. Discontinue **immediately** if any part is found to be damaged or broken.

The **maximum** weight of the child for which this bassinet is intended is 7 kg's (15.5 lbs)

The **maximum** height of the child for which this stroller is intended is 66 cm (26 ins)

This product will become unstable if the recommended load is exceeded.

Can be used from birth +.

**NEVER jog with a newborn baby in any pram or stroller until the child can sit up unassisted (approximately 6 months).**

**ALWAYS** ensure that the child is clear of all moving parts when adjusting the stroller.

**ALWAYS** beware of little fingers when folding or unfolding your stroller to prevent finger entrapments.

**ALWAYS** engage the brake system when the stroller is at rest.

**NEVER** leave any child unattended in the stroller.

**NEVER** use on escalators or stairs.

When in the stroller the child must **ALWAYS** wear the safety harness, correctly fitted and adjusted, at all times.

**DO NOT** hang shopping bags from the handle as this may affect the stroller's stability.

**Always** use the basket provided, the **maximum** weight in the basket is 6 kg's (13 lbs)

Do not carry additional children. It may be unsafe to use any accessories other than VALCO approved ones.

**ALWAYS** be aware of the risks provided by fire and other significant sources of heat such as radiators etc. which may be in the immediate vicinity of your stroller.

This product is intended for domestic use only. It is not intended for commercial use.

Continued and extended exposure to sunlight and the elements can change the colours of many materials. To avoid fading, always cover and store in a shaded area.

### Caring for your pram

Moving parts may be lubricated with silicone based lubricants – do not use oil.

Regularly check wheels for loose spokes – tighten as necessary.

Your Runabout chassis is made of aluminium alloy but does include some metal parts. Special care must always be taken to avoid rust. If this pram is used near the ocean or salty air environments, spray the chassis and seat frame with water and dry thoroughly. This is particularly important for parts such as wheel **spokes** and **springs**. We recommend rust inhibiting product should be applied to prevent accelerated rust and fatigue of these metal parts!

We recommend that you wipe down axles and lubricate the wheels every 3 months, particularly the front wheel and housing. Sand and dirt can grind down axles so, if you live, walk or run near/on the beach or in a dusty environment, you must remove and wipe down the axles and wheels, then lubricate them **MONTHLY**.

### Washing Instructions

The removable lining and mattress can be **COLD** hand or machine washed using a very mild detergent (and a gentle cycle for machine wash). Remember to only wash with like colours. Drip dry – do not tumble dry!
